The Office of the Talent Acquisition Team

Esri Canada

Bay Adelaide East, 8 Adelaide Street West, Suite 200

Toronto, ON M5H 0A9

Dear Hiring Team,

I am excited to apply for the Engineering, AI & Data New Graduate opportunity with Deloitte Canada. I recently completed my Master of Engineering in Geomatics Engineering at the University of Calgary, and I am particularly interested in this role because it combines technology, engineering, analytical problem-solving, and collaborative transformation work across multidisciplinary environments.

My background combines engineering systems thinking, software-oriented problem-solving, technical visualization, automation workflows, and analytical project experience. Through both academic and independent projects, I have worked with Python, SQL, JavaScript, HTML/CSS, GIS technologies, automation workflows, and interactive digital systems to develop technical solutions, process data, automate workflows, and communicate insights effectively.

One of my strongest recent projects involved the development of an interactive geospatial portfolio system integrating responsive frontend behavior, animation systems, filtering workflows, fullscreen interactions, and mobile-compatible layouts. I also completed analytical projects involving Python-based clustering analysis, spatial databases, geospatial automation, and structured data processing workflows requiring problem-solving, validation, and technical documentation.

In addition to technical capabilities, I bring strong adaptability, interdisciplinary collaboration, and communication skills developed through engineering, technology, and creative systems work. I enjoy learning new technologies, solving technical challenges, and working collaboratively to build systems that are both functional and user-focused.

What attracts me most to Deloitte is the opportunity to contribute to impactful engineering and transformation projects while continuing to grow across cloud technologies, software systems, automation, and technical consulting environments. I am excited by the opportunity to work alongside multidisciplinary teams solving complex business and technical problems through innovative engineering solutions.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my technical background, adaptability, and problem-solving mindset can contribute to Deloitte's Engineering, AI & Data practice.

Sincerely,

Chisom Victor Onyeukwu

CHISOM VICTOR ONYEUKWU

PROFESSIONAL SUMMARY

Geomatics Engineering graduate from the University of Calgary with a background in software systems, geospatial analytics, Python-based automation, technical visualization, and interdisciplinary engineering workflows. Experienced in problem-solving across data analysis, application-oriented systems, spatial technologies, technical documentation, and interactive digital platforms. Strong interest in engineering transformation, scalable technical solutions, automation, cloud technologies, and AI-assisted workflows.

TECHNICAL SKILLS

Programming & Engineering

Python, SQL, JavaScript, HTML5, CSS3, MATLAB, C++, object-oriented programming concepts, scripting workflows, responsive web systems.

Data & Analytical Systems

Data analysis, automation workflows, spatial databases, SQL querying, geospatial data processing, clustering analysis, QA/QC validation, technical troubleshooting.

Software & Visualization

Jupyter Notebook, Google Colab, ArcGIS Pro, QGIS, PowerPoint, Excel, technical reporting, dashboard thinking, UI/UX fundamentals, technical presentation systems.

Collaboration & Workflow

Agile collaboration, technical communication, stakeholder-focused problem-solving, AI-assisted workflows, documentation, adaptable learning environments.

PROFESSIONAL EXPERIENCE

GIS & Geospatial Data Intern

NorthGrid Spatial Analytics — Canada | May 2025 – September 2025

- Supported technical workflows involving spatial data validation, QA/QC checks, reporting, geospatial database maintenance, and infrastructure-related datasets.
- Assisted with analytical problem-solving, technical documentation, data organization, and stakeholder-ready visualization deliverables.
- Collaborated with multidisciplinary team members on project workflows requiring accuracy, adaptability, and technical communication.

GIS & Geomatics Engineering Intern

VICDANPEE PLC — Port Harcourt, Nigeria | 2021 – 2022

- Assisted with technical data collection, spatial analysis workflows, infrastructure documentation, and mapping-related project support.
- Supported coordinate verification, feature digitization, technical reporting, and data organization activities within multidisciplinary engineering workflows.
- Contributed to analytical and documentation processes requiring precision, collaboration, and structured problem-solving.

Creative Director & Visual Systems Lead

ZüNIVERSE / Independent Projects — Lagos, Nigeria | 2021 – Present

- Designed and developed responsive digital portfolio systems integrating interactive UI behaviour, animation systems, structured content architecture, and technical storytelling.
- Applied AI-assisted workflows to accelerate development, debugging, documentation, ideation, and interface refinement processes.

- Developed adaptable visual systems emphasizing usability, accessibility, responsive behaviour, and user-focused interaction design.
-

SELECTED GEOSPATIAL PROJECTS

Interactive Geospatial Portfolio System

- Developed a responsive portfolio platform integrating animation systems, interactive UI components, filtering systems, full screen modals, and mobile-compatible layouts.
- Applied frontend development principles emphasizing usability, responsive behaviour, accessibility, and technical storytelling.

Spatiotemporal Traffic Incident Analysis — Calgary

- Analyzed transportation incident datasets using Python, clustering methods, and geospatial workflows to identify temporal and spatial patterns.
- Developed technical visuals, hotspot outputs, and analytical reporting systems supporting data interpretation.

Geospatial Automation & Data Processing

- Implemented Python-based automation workflows involving geometry simplification, spatial validation, clustering analysis, and reproducible analytical pipelines.
- Applied GeoPandas, Shapely, SQL, and geospatial data processing concepts across technical projects.

Spatial Databases & Data Mining

- Designed and queried relational database structures using SQL and spatial database concepts.
 - Applied clustering and analytical workflows to support spatial insight extraction and structured data analysis.
-

EDUCATION

Master of Engineering (MEng), Geomatics Engineering

University of Calgary — Calgary, AB | Completed April 2026

- Relevant Areas: data analysis, spatial databases, automation workflows, geospatial systems, remote sensing, technical reporting, and analytical problem-solving.

Bachelor of Science (BSc), Computer Science

Madonna University — Nigeria | 2016 – 2020

- Relevant focus: software engineering, databases, programming, systems analysis, and technical problem-solving.
-

ADDITIONAL INFORMATION

- Legally entitled to work in Canada.
- Comfortable working remotely or in hybrid environments.
- Open to occasional travel as required.
- Actively pursuing continued learning in Esri technologies and GIS best practices.

University of Calgary - Record of Course Work

Reason: WEB

----- Credential Awarded -----

Credential: Master of Engineering
Conferral: 2026-06-03
Area of Study: Geomatics Engineering

----- Beginning of Graduate Programs Record -----

----- Course Work -----

Fall 2024

Program: Master's Degree in the Faculty of Graduate Studies
Master of Engineering (Degree Stream)
Geomatics Engineering (Area of Study)

<u>Course</u>	<u>Description</u>	<u>Attempted</u>	<u>Earned</u>	<u>Grade</u>	<u>Points</u>
ENGG 661	(ENGG461) Geosptal Data Anyltyc	3.00	3.00	A-	11.100
ENGG 680	Intro to Digital Engineering	3.00	3.00	B+	9.900
Term GPA:	3.50	Term Totals:	6.00	6.00	21.000

Winter 2025

Program: Master's Degree in the Faculty of Graduate Studies
Master of Engineering (Degree Stream)
Geomatics Engineering (Area of Study)

<u>Course</u>	<u>Description</u>	<u>Attempted</u>	<u>Earned</u>	<u>Grade</u>	<u>Points</u>
ENGO 634	(ENGO431)Prncpls of Phtgrmmtry	3.00	3.00	B+	9.900
ENGO 645	Spatial Databases & DataMining	3.00	3.00	B+	9.900
ENGO 650	Satellite Positioning	3.00	3.00	C-	5.100
Term GPA:	2.76	Term Totals:	9.00	9.00	24.900

Fall 2025

Program: Master's Degree in the Faculty of Graduate Studies
Master of Engineering (Degree Stream)
Geomatics Engineering (Area of Study)

<u>Course</u>	<u>Description</u>	<u>Attempted</u>	<u>Earned</u>	<u>Grade</u>	<u>Points</u>
ENGG 684	Intro Project Management	3.00	3.00	B-	8.100
ENGO 641	(ENGO451)Dsgn & Implmntn GIS	3.00	3.00	B+	9.900
ENGO 664	Data Analysis in Engineering	3.00	3.00	B	9.000
Term GPA:	3.00	Term Totals:	9.00	9.00	27.000

Winter 2026

Program: Master's Degree in the Faculty of Graduate Studies
Master of Engineering (Degree Stream)
Geomatics Engineering (Area of Study)

<u>Course</u>	<u>Description</u>	<u>Attempted</u>	<u>Earned</u>	<u>Grade</u>	<u>Points</u>
ENGG 683	Innovation & Entrepreneurship	3.00	3.00	A-	11.100
ENGG 686	Climate Chng Adaptation ENGG	3.00	3.00	B+	9.900
ENGO 650	Satellite Positioning	3.00	3.00	B	9.000
Term GPA:	3.33	Term Totals:	9.00	9.00	30.000
