PROFESSIONAL SUMMARY

Geomatics Engineering graduate from the University of Calgary with experience in environmental GIS, spatial analysis, geospatial databases, field-support workflows, technical reporting, and analytical problem-solving. Strong background in environmental mapping, spatial interpolation, data validation, and geospatial modeling workflows supporting infrastructure and environmental analysis projects. Interested in environmental monitoring, reclamation support, environmental risk analysis, and multidisciplinary geoscience collaboration.

TECHNICAL SKILLS

Environmental & Spatial Analysis

Environmental GIS, spatial interpolation, geospatial analysis, raster/vector workflows, environmental mapping, transportation analysis, QA/QC workflows, spatial databases

Data & Technical Tools

Python, SQL, ArcGIS Pro, QGIS, GeoPandas, Jupyter Notebook, Google Colab, Microsoft Office Suite, analytical visualization, technical reporting

Data Management & Reporting

Field data collection support, GPS/GNSS concepts, environmental sampling awareness, infrastructure documentation, technical inspection support, data organization

Professional Strengths

Technical communication, analytical problem-solving, multidisciplinary collaboration, environmental reporting, adaptable learning, safety-conscious workflows

PROFESSIONAL EXPERIENCE

GIS & Geospatial Data Intern

NorthGrid Spatial Analytics — Canada | May 2025 – September 2025

- Supported environmental and infrastructure-related GIS workflows involving spatial QA/QC, technical reporting, database organization, and analytical mapping.
- Assisted with validation and preparation of geospatial datasets supporting technical interpretation and reporting activities.
- Collaborated with multidisciplinary teams to produce stakeholder-ready mapping and analytical outputs.

Field Survey & Infrastructure Support Technician

VICDANPEE PLC — Port Harcourt, Nigeria | June 2021 – July 2022

- Assisted with spatial data organization, technical documentation, field verification support, and infrastructure-related mapping workflows.
- Supported analytical and reporting processes involving environmental and utility-related datasets.
- Contributed to GIS workflows requiring structured data handling and technical consistency.

Creative Systems & Technical Visualization Lead

7ÜNIVERSE / Independent Projects | 2021 – Present

- Developed analytical visualization systems and technical portfolio environments integrating data storytelling, responsive interfaces, and structured technical communication.
 - Applied AI-assisted workflows to support technical documentation, analytical reporting, and workflow optimization.
-

SELECTED GEOSPATIAL PROJECTS

Environmental GIS & Spatial Interpolation

- Completed GIS applications involving snowfall interpolation, greenhouse gas emissions mapping, sustainable transportation analysis, and environmental spatial visualization using ArcGIS workflows.

- Applied raster analysis, interpolation methods, and thematic mapping techniques to support environmental interpretation.

Spatiotemporal Traffic Incident Analysis — Calgary

- Analyzed transportation incident datasets using Python, KDE, DBSCAN, HDBSCAN, and temporal analysis workflows to identify recurring spatial patterns and hotspots.
- Produced analytical reporting outputs and visualization systems supporting data interpretation.

Spatial Databases & Geospatial Data Mining

- Designed and queried structured spatial databases using SQL and GIS database concepts.
- Applied clustering workflows and analytical methods to extract patterns from large datasets.

Interactive Portfolio & Visualization System

- Implemented Python-based workflows for data processing, validation, geometry simplification, and reproducible analytical pipelines.
- Performed output verification and technical documentation supporting analytical consistency.

EDUCATION

Master of Engineering (MEng), Geomatics Engineering

University of Calgary — Calgary, AB | Completed April 2026

- Relevant Areas: environmental GIS, spatial databases & data mining, satellite positioning, geospatial visualization, spatial analysis & modeling.

Bachelor of Science (BSc), Computer Science

Madonna University — Nigeria | 2016 – 2020

- Relevant focus: software engineering, databases, programming, systems analysis, and technical problem-solving.

ADDITIONAL INFORMATION

- Eligible to pursue professional engineering/geoscience pathways in Canada.
- Comfortable supporting field-based environmental and monitoring workflows.
- Strong interest in environmental systems, reclamation support, and multidisciplinary geoscience projects.
