Portfolio: <https://cvo-geospatialdataanalyst-portfolio.netlify.app/applications/get/>

PROFESSIONAL SUMMARY

Geomatics Engineering graduate student with hands-on experience in field survey support, infrastructure documentation, GIS mapping, spatial data QA/QC, technical reporting, and multidisciplinary project support. Strong foundation in measurement systems, coordinate control, site data collection, data management, geospatial analysis, and engineering-style documentation. Interested in building a geotechnical engineering career through site investigations, construction reviews, inspections, data analysis, formal reporting, and collaboration with engineers, contractors, and clients.

SKILLS

Field & Site Support

- Field survey support, GPS/GNSS concepts, control point verification, site measurements, topographic data collection, site progress notes, as-built documentation, infrastructure records, field safety awareness.

Geomatics & Spatial Analysis

- Coordinate systems, spatial data validation, ArcGIS Pro, QGIS, raster/vector workflows, spatial interpolation, environmental GIS, transportation and infrastructure mapping, cartographic production.

Technical Reporting & Data

- Engineering-style documentation, technical writing, data QA/QC, stakeholder-ready visuals, Python, SQL, MATLAB, Jupyter Notebook, Google Colab, reproducible workflows, technical troubleshooting.

Collaboration & Adaptability

- Multidisciplinary teamwork, problem-solving, task ownership, willingness to learn from senior engineers, flexibility for field and office environments, adaptable to changing project conditions.
-

PROFESSIONAL EXPERIENCE

GIS & Geospatial Data Intern

NorthGrid Spatial Analytics — Canada | May 2025 – September 2025

- Supported GIS data maintenance, spatial QA/QC, map production, and technical documentation for infrastructure, urban, and environmental spatial datasets.
- Assisted with coordinate checks, attribute review, data cleaning, and technical reporting to improve consistency and reliability of project deliverables.
- Prepared project-ready maps and visual outputs using clear layouts, readable symbology, and stakeholder-focused communication.

Field Survey & Infrastructure Support Technician

Civil & Utility Works Contractor — Lagos State, Nigeria | January 2023 – December 2023

- Supported civil and utility infrastructure projects through site layout assistance, control point verification, field measurements, and topographic data collection.
- Organized field data, site notes, and spatial references for as-built documentation, progress reporting, and infrastructure records.
- Assisted with field quality checks and documentation review to maintain accuracy, consistency, and safety-conscious work practices.

GIS & Geomatics Engineering Intern

VICDANPEE PLC — Port Harcourt, Nigeria | 2021 – 2022

- Collected, compiled, and validated spatial datasets for power distribution networks, road corridors, utility assets, and infrastructure documentation.

- Supported GPS-based field verification, feature digitization, attribute standardization, and spatial data organization workflows.
 - Prepared infrastructure mapping outputs and technical documentation supporting planning and project review activities.
-

SELECTED GEOSPATIAL PROJECTS

Environmental GIS & Spatial Interpolation

- Completed GIS applications involving snowfall interpolation, greenhouse gas mapping, sustainable transportation analysis, and earthquake visualization.
- Applied raster and vector analysis workflows to produce map-based technical deliverables and spatial comparisons.

Spatiotemporal Traffic Incident Analysis — Calgary

- Analyzed Calgary traffic incidents using spatial and temporal methods to identify recurring hotspots and transportation safety patterns.
- Prepared GIS-ready datasets, technical visuals, and reporting outputs supporting data interpretation.

Boundary Simplification & Geospatial Automation

- Implemented Python-based geospatial processing workflows using geometry simplification methods and spatial data libraries.
- Validated outputs and documented reproducible workflows for technical analysis.

Spatial Databases & Data Mining

- Designed and queried spatial databases using SQL and relational database concepts.
 - Applied clustering and pattern recognition methods to extract insight from spatial datasets.
-

EDUCATION

Master of Engineering (MEng), Geomatics Engineering

University of Calgary — Calgary, AB | Completed April 2026

- Relevant Areas: GIS, Spatial Databases, Spatial Statistics, Remote Sensing, Photogrammetry, Satellite Positioning, Technical Reporting, and infrastructure mapping.

Bachelor of Science (BSc), Computer Science

Madonna University — Nigeria | 2016 – 2020

- Minor focus in Software Engineering, Databases, and Data Analysis.
-

ADDITIONAL INFORMATION

- Available for Calgary-based in-person work, field assignments, project travel, and variable project schedules.
- Open to full-time or part-time opportunities.
- Interested in geotechnical consulting, field investigations, construction reviews, inspections, data analysis, and formal reporting.
