Portfolio: <https://cvo-geospatialdataanalyst-portfolio.netlify.app/applications/super/>

PROFESSIONAL SUMMARY

Geomatics Engineering graduate from the University of Calgary with experience in data analysis, Python-based analytical workflows, SQL querying, spatial data mining, dashboard-oriented thinking, and technical visualization. Skilled in cleaning, organizing, analyzing, and communicating complex datasets through structured analytical workflows and stakeholder-focused reporting. Strong interest in data-driven decision-making, product analytics, business intelligence, and AI-assisted analytical systems.

TECHNICAL SKILLS

Data Analysis & Visualization

Python, SQL, data cleaning, data validation, exploratory analysis, clustering analysis, dashboard thinking, data storytelling, technical visualization, reporting workflows

Programming & Analytics

Python, SQL, MATLAB, JavaScript, Jupyter Notebook, Google Colab, GeoPandas, Shapely, reproducible workflows, analytical automation

GIS & Spatial Analytics

ArcGIS Pro, QGIS, spatial analysis, spatial databases, geospatial data mining, transportation analysis, environmental analytics, cartographic visualization

Collaboration & Workflow

AI-assisted workflows, technical communication, stakeholder-focused analysis, adaptable learning environments, problem-solving, independent and collaborative work

PROFESSIONAL EXPERIENCE

GIS & Geospatial Data Intern

NorthGrid Spatial Analytics — Canada | May 2025 – September 2025

- Supported analytical workflows involving spatial data validation, QA/QC checks, reporting, geospatial database maintenance, and infrastructure-related datasets.
- Assisted with organizing, cleaning, and validating technical datasets to improve consistency and analytical usability.
- Collaborated with technical team members to prepare stakeholder-ready visualizations and reporting outputs.

GIS & Geomatics Engineering Intern

VICDANPEE PLC — Port Harcourt, Nigeria | 2021 – 2022

- Assisted with data collection, organization, validation, and reporting workflows supporting utility and infrastructure-related projects.
- Supported technical documentation, feature verification, mapping outputs, and analytical problem-solving tasks within multidisciplinary workflows.
- Contributed to data preparation and spatial analysis processes requiring precision, organization, and collaboration.

Creative Director & Visual Systems Lead

TüNIVERSE / Independent Projects — Lagos, Nigeria | 2021 – Present

- Developed interactive portfolio systems integrating responsive interfaces, visualization workflows, structured data presentation, and user-focused interaction systems.
- Applied AI-assisted workflows for technical documentation, interface refinement, debugging, ideation, and workflow acceleration.

- Built visual communication systems emphasizing usability, clarity, accessibility, and organized information architecture.
-

SELECTED GEOSPATIAL PROJECTS

Spatiotemporal Traffic Incident Analysis — Calgary

- Analyzed ~51K Calgary traffic incidents using Python, KDE, DBSCAN, HDBSCAN, and temporal analysis workflows to identify recurring spatial patterns and hotspots.
- Cleaned, organized, and visualized large datasets to generate analytical insights and stakeholder-ready reporting outputs.

Geospatial Automation & Analytical Processing

- Built Python-based automation workflows using GeoPandas and Shapely for data processing, geometry simplification, and reproducible analytical pipelines.
- Performed data validation and output verification to improve workflow consistency.

Spatial Databases & Data Mining

- Designed and queried structured databases using SQL and spatial database concepts.
- Applied clustering and analytical workflows to extract patterns and insights from complex datasets.

Interactive Portfolio & Visualization System

- Developed a responsive portfolio platform integrating animation systems, interactive UI components, filtering systems, full screen modals, and mobile-compatible layouts.
 - Applied frontend development principles emphasizing usability, responsive behaviour, accessibility, and technical storytelling.
-

EDUCATION

Master of Engineering (MEng), Geomatics Engineering

University of Calgary — Calgary, AB | Completed April 2026

- Relevant Areas: data analysis, spatial databases, automation workflows, geospatial systems, remote sensing, technical reporting, and analytical problem-solving.

Bachelor of Science (BSc), Computer Science

Madonna University — Nigeria | 2016 – 2020

- Relevant focus: software engineering, databases, programming, systems analysis, and technical problem-solving.
-

ADDITIONAL INFORMATION

- Legally entitled to work in Canada.
- Comfortable working remotely or in hybrid environments.
- Open to occasional travel as required.
- Actively pursuing continued learning in Esri technologies and GIS best practices.
