Portfolio: <https://cvo-geospatialdataanalyst-portfolio.netlify.app/applications/suncor/>

PROFESSIONAL SUMMARY

Geomatics Engineering graduate from the University of Calgary with experience in field survey support, infrastructure monitoring, spatial data QA/QC, technical reporting, GIS workflows, and analytical problem-solving. Strong foundation in field measurements, instrumentation-related data handling, coordinate systems, technical documentation, and geospatial analysis. Interested in supporting geotechnical and operational performance programs through field monitoring, surveillance workflows, data validation, and infrastructure-focused technical support.

TECHNICAL SKILLS

Field Monitoring & Infrastructure Support

Field survey support, GPS/GNSS concepts, topographic measurements, control point verification, infrastructure documentation, field inspections, monitoring workflows, site surveillance, instrumentation data handling.

Technical & Analytical Tools

ArcGIS Pro, QGIS, AutoCAD fundamentals, Microsoft Office Suite, Excel reporting, spatial QA/QC, data validation, analytical troubleshooting, technical documentation.

Data Management & Reporting

Python, SQL, Jupyter Notebook, Google Colab, structured reporting workflows, technical summaries, data organization, anomaly identification, reproducible analytical workflows.

Professional Strengths

Problem-solving, multidisciplinary collaboration, field adaptability, attention to detail, safety-conscious work practices, technical communication, independent and team-based work.

PROFESSIONAL EXPERIENCE

GIS & Geospatial Data Intern

NorthGrid Spatial Analytics — Canada | May 2025 – September 2025

- Supported GIS workflows involving spatial QA/QC, technical reporting, infrastructure mapping, and geospatial database maintenance.
- Assisted with data validation, coordinate checks, map production, and documentation workflows supporting technical project accuracy.
- Collaborated with technical teams to prepare organized and stakeholder-ready mapping and reporting deliverables.

Field Survey & Infrastructure Support Technician

Civil & Utility Works Contractor — Lagos State, Nigeria | January 2023 – December 2023

- Assisted with topographic measurements, control point verification, field inspections, and infrastructure documentation for civil and utility projects.
- Organized field notes, progress records, and measurement data supporting project monitoring and reporting activities.

Supported field quality checks and documentation review processes to maintain consistency and accuracy.

GIS & Geomatics Engineering Intern

VIC DANPEE PLC — Port Harcourt, Nigeria | 2021 – 2022

- Collected, validated, and organized spatial datasets for utility infrastructure and transportation-related projects.
- Assisted with GPS-based field verification, feature digitization, coordinate review, and technical documentation workflows.

- Supported mapping and analytical processes requiring careful data handling and technical consistency.
-

SELECTED GEOSPATIAL PROJECTS

Spatiotemporal Traffic Incident Analysis — Calgary

- Analyzed ~51K Calgary traffic incidents using Python, KDE, DBSCAN, HDBSCAN, and temporal analysis workflows to identify recurring spatial patterns and hotspots.
- Cleaned, organized, and visualized large datasets to generate analytical insights and stakeholder-ready reporting outputs.

Geospatial Automation & QA/QC

- Implemented Python-based workflows for geometry simplification, data validation, and reproducible analytical processing.
- Performed output verification and technical documentation for analytical consistency.

Spatial Databases & Monitoring Data Workflows

- Designed and queried structured spatial databases using SQL and geospatial database concepts.
- Applied validation and analytical methods to improve organization and interpretation of technical datasets.

Interactive Portfolio & Visualization System

- Completed GIS applications involving environmental mapping, snowfall interpolation, and transportation analysis.
 - Applied raster and vector workflows to process and visualize environmental and operational datasets.
-

EDUCATION

Master of Engineering (MEng), Geomatics Engineering

University of Calgary — Calgary, AB | Completed April 2026

- Relevant Areas: data analysis, spatial databases, automation workflows, geospatial systems, remote sensing, technical reporting, and analytical problem-solving.

Bachelor of Science (BSc), Computer Science

Madonna University — Nigeria | 2016 – 2020

- Relevant focus: software engineering, databases, programming, systems analysis, and technical problem-solving.
-

ADDITIONAL INFORMATION

- Comfortable working in field environments, rotational schedules, and remote operational settings.
- Strong interest in infrastructure monitoring, geotechnical support systems, and operational data analysis.
- Familiar with safety-conscious technical workflows and multidisciplinary collaboration environments.
