Lexie Di Gaeta

Senior Talent Acquisition Specialist at Onterris

Onterris

Calgary, Alberta

Re: GIS Analyst - Onterris, Calgary

Dear Lexie,

I am excited to apply for the GIS Analyst position with Onterris. I recently completed my Master of Engineering in Geomatics Engineering at the University of Calgary, where I developed strong experience in GIS workflows, geospatial databases, cartographic production, spatial analysis, environmental GIS, and Python-based geospatial processing.

My background combines applied geospatial analysis with practical GIS and infrastructure support experience. During my GIS and geomatics internship with VICDANPEE PLC, I contributed to spatial data collection, coordinate verification, feature digitization, geospatial database organization, and cartographic workflows supporting infrastructure and utility-related projects. I also assisted with GPS field data capture, technical documentation, and spatial QA/QC processes.

At the University of Calgary, I further strengthened my GIS and analytical skills through projects involving spatiotemporal traffic hotspot detection, environmental GIS, spatial databases, geospatial automation, and spatial data mining. These projects required the preparation and validation of spatial datasets, map production, spatial analysis, database querying, and the communication of technical findings through stakeholder-ready visual outputs and reports.

I am particularly drawn to Onterris because of the company's multidisciplinary environmental and geospatial work, collaborative culture, and focus on practical solutions that support both environmental responsibility and infrastructure development. I would welcome the opportunity to contribute my GIS, cartographic, analytical, and technical communication skills to your team while continuing to grow within a consulting-oriented geospatial environment.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my background and technical experience can contribute to Onterris' GIS and environmental services teams.

Sincerely,

Chisom Victor Onyeukwu
